CONTENTS VOL. 110, 1989

Research Papers

Measurements of hydraulic conductivity of silt loam soils using an infiltration method
J.A. van den Berg (Utrecht, The Netherlands) 1
An analysis of trichloroethylene movement in groundwater at Castle Air Force Base, California
L. Avon and J.D. Bredehoeft (Menlo Park, Calif., U.S.A.) 23
A physical model to complement rainfall normals over complex terrain
P. Alpert and H. Shafir (Ramat Aviv, Israel 51
Perched brine plumes above salt domes and dewatering of geopressured sediments
V. Ranganathan (Bloomington, Ind., U.S.A.) and J.S. Hanor (Baton Rouge, La., U.S.A.) 63
Preferential solute transport in layered homogeneous sands as a consequence of wetting front instability
R.J. Glass, G.H. Oosting and T.S. Steenhuis (Ithaca, N.Y., U.S.A.) 87
Flood forecasting by the filter separation AR method and comparison with modeling efficiencies by some rainfall–runoff models
M. Hasebe (Utsunomiya, Japan), M. Hino (Tokyo, Japan) and K. Hoshi (Sapporo, Japan) 107
Deriving the unit hydrograph by root selection
J.E. Turner, T. Bree and J.C.I. Dooge (Dublin, Ireland) 137
Radiotracer dispersion tests in a fissured aquifer
D. Stephenson, W.A.J. Paling (Johannesburg, South Africa) and A.S.M. De Jesus (Pretoria, South Africa) 153
On the discretization and cost-effectiveness of a finite element solution for hillslope subsurface flow
A. Calver (Wallingford, U.K.) and W.L. Wood (Wallingford, U.K.) 165
Water flow in a hummocky landscape in central Saskatchewan, Canada, II. Saturated flow and groundwater recharge
B.J. Zebarth (Guelph, Ont., Canada), E. de Jong and J.L. Henry (Saskatoon, Sask., Canada) 181
Water flow in a hummocky landscape in central Saskatchewan, Canada, III. Unsaturated flow in relation to topography and land use
B.J. Zebarth (Guelph, Ont., Canada) and E. de Jong (Saskatchewan, Sask., Canada) . . 199

Announcements 219

Research Papers

Nonpoint source pollution control effectiveness of riparian forests along a coastal plain river
J.D. Phillips (Greenville, N.C., U.S.A.). 221
Further research on application of probability weighted moments in estimating parameters of the Pearson Type Three distribution
J. Ding (Sichuan, P.R. of China), D. Song (Nanjing, P.R. of China) and R. Yang (Sichuan, P.R. of China) 239
Expressions relating probability weighted moments to parameters of several distributions inexpressible in inverse form
D. Jing (Sichuan, P.R. of China), D. Song (Nanjing, P.R. of China), R. Yang and Y. Hou (Sichuan, P.R. of China) 259

Computer analysis of regional groundwater flow and boundary conditions in the Basin of Mexico
G.A. Ortega (Mexico City, Mexico) and R.N. Farvolden (Waterloo, Ont., Canada) 271
Geostatistical modeling of the Wasia aquifer in central Saudi Arabia
A.M. Subyani (Jeddah, Kingdom of Saudi Arabia) and Z. Sen (Istanbul, Turkey) 295
Graphical estimation of extreme value prediction functions
W.E. Bardsley (Hamilton, New Zealand) 315
A feedback mechanism in annual rainfall, Central Sudan
E.A.B. Eltahir (Khartoum, Sudan) 323
Snowfall into a forest and clearing
R.A. Schmidt and C.A. Troendle (Fort Collins, Colo., U.S.A.) 335
Segmentation des séries hydrométéorologiques – Application à des séries de précipitations et de débits de l'Afrique de l'Ouest (Hydrometeorological time series segmentation – Application to West African rainfall and discharge series)
P. Hubert (Fontainebleau, France), J.P. Carbonnel (Paris, France) et A. Chaouche (Fontainebleau, France) 349

Short Notes

Pumpage, water levels and rainfall in three wellfields in western Galilee, Israel
B. Azmon (Haifa, Israel) 369
Fluorine enrichment in groundwater recharged through loess and dust deposits, southern Israel
U. Kafri, A. Arad, L. Halicz (Jerusalem, Israel) and E. Ganor (Tel Aviv, Israel) 373

Discussions

Extraordinary floods in early Chinese history and their absolute dates – Comment
D.W. Pankenier (Bethlehem, Pa., U.S.A.) 377
Extraordinary floods in early Chinese history and their absolute dates – Reply
K.D. Pang (Pasadena, Calif., U.S.A.) 378
The theory of runs with applications to drought prediction – Comment
Z. Şen (Istanbul, Turkey) 383
The theory of runs with applications to drought prediction – Reply
L.A. Moyé (Houston, Tex., U.S.A.) 391

Subject Index Volumes 105–110 393
